Summary

Frontend Developer with 4+ years of commercial experience specializing in building modern web applications with React and TypeScript. Proven track record in developing reusable components, optimizing application performance, and integrating RESTful APIs. Adept at collaborating in Agile environments with professional proficiency in English and a working knowledge of German. Focused on maintaining high code quality and delivering efficient frontend solutions.

Work Experience

Frontend Developer

Sigma Software

07.2022 - present (remote)

- Developed and maintained internal React and TypeScript applications to replace manual Excel workflows, streamlining configuration creation for complex telecom solutions and reducing sales managers' proposal preparation time from 24 to 13 days.
- Collaborated with UX/UI designers to build responsive interfaces using Sass/Less and an internal component library, ensuring strict compliance with semantic HTML and cross-browser compatibility.
- Worked with backend developers to integrate frontend components with server-side logic, ensuring seamless data flow and consistent application performance.
- Led the migration of project dependencies to modern React 19 and maintained build environments using Vite, while ensuring system stability and keeping comprehensive test coverage (94%) using Vitest and Cypress.
- Contributed to CI/CD pipelines in Azure DevOps, enabling 12 releases per year with zero downtime, gaining hands-on experience in build and deployment processes.
- Worked within an Agile environment, adapting to evolving business needs through iterative development and regular team collaboration.

Intern Frontend Developer

Sigma Software

02.2022 - 06.2022 (remote)

- Contributed to 2 frontend projects in a team setting, applying Agile workflows and version control with Git.
- Built a volunteer coordination app using Vue.js, implementing state management with Vuex and integrating Firebase Authentication and Realtime Database.
- Designed and developed a responsive weather app UI in Figma, then implemented it using Angular, RxJS, and SCSS, including theme switching and API integration.
